IOTA contest

# IOTA vad är det?

IOTA = Islands On The Air

Näst störst aktivitetsprogrammet inom amatörradio (DXCC större)

Samla ögrupper

Maxantalet ögrupper är satt till 1200

1136 ögrupper aktiverade

9A2AA 1132

SM3EVR och SM6CVX 1116

En kontakt är tillräckligt - det blir inte bättre om man kör fler

# Vad är en ö och var finns de?

En naturlig landmassa omgiven av vatten som är ovanför vattenytan oavsett tidvatten nivå.

FN:s Havsrättskonvention

Öar finns i vattendrag, insjöar och hav

# Vad är en ö och var finns de?

En naturlig landmassa omgiven av vatten som är ovanför vattenytan oavsett tidvatten nivå.

FN:s Havsrättskonvention

Öar finns i ~~vattendrag, insjöar och hav~~

Ön skall ligga minst 200 m från fastland

Namnet skall gå att hitta i sjökort eller Google Earth

Ej finnas i stora avskilda vikar, estuarium eller floder

Ön skall finnas i IOTA:s listor (finns på IOTA:s hemsida)

# Vad är en ögrupp - IOTA?

Officiellt erkända ögrupper – Gotland EU-020

Avlägsna ögrupper – Totakoto atoll OC-298

Inofficiella ögrupper (främst kustöar) – Kalmar län EU-038

DXCC öar – Isle of Man EU-116

Stora öar – Australien OC-001

Enskilda öar med landsgräns – Märket EU-153

Andra enskilda öar – Rockall EU-168

# Hur många ögrupper finns det

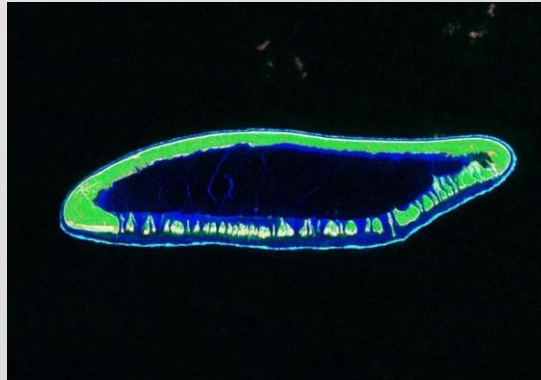

Maximalt 1200 ögrupper

1132 ögrupper har hitintills aktiverats

Your checkpoint (click here for details) can answer most enquiries, for general enquiries contact us at [info@iota-world.org](mailto:info@iota-world.org).

## Welcome to IOTA, Islands On The Air

IOTA is an exciting and innovative activity programme that has caught the interest of thousands of radio amateurs worldwide. Established in 1964, it promotes radio contacts with stations located on islands around the world to enrich the experience of all active on the amateur bands and, to do this, it draws on the widespread mystique surrounding islands. It is administered by Islands On The Air (IOTA) Ltd (called here IOTA Management) in partnership with the Radio Society of Great Britain (RSGB).

IOTA Management has grouped the oceans' islands into some 1200 'IOTA groups' with, for reasons of geography, varying numbers of 'counters', i.e. qualifying islands, in each group and has published the listings in the IOTA Directory and on the IOTA website. The objective, for the IOTA Island Chaser, is to make radio

Callsign (\*)

QSOs (\*)  HF  VHF

Requirements for contacting support (\*)  I understand that I need to do the following checks in case I do not get an expected QSO match **before** I contact support.

- Is your callsign in the Log Search of the operation in question?
- Is the DX callsign in the Log Search of your own log?
- Do the frequencies and modes in both Log Searches match?
- Is the operation listed in the list of 'Accepted Activations'?
- Have 30 days passed from the time and date of the QSO?
- Is the IOTA Group you are trying to match, already in your pending QSOs or accepted QSOs list (You can't have it twice)? However if there is a QSO match for a pending QSL then that QSO match will replace the pending QSL automatically.
- Did you check the UTC of your QSO? It is not allowed to differ more than 15 minutes from the UTC in the activations log.
- Are you sure you used the correct credentials to connect to Club Log?
- If you cannot login to Club Log from the IOTA website then get a one time password from Settings -> App. Password. Use this on the IOTA website to get QSO matches.

**RETRIEVE QSOs FROM CLUB LOG**

(b) Stations operating from a qualifying island are "Island Stations". They must make sure beforehand that the QTH from which they are operating is a valid island for IOTA purposes. This can be checked and Island References can be obtained *on IOTA's WEB-page*.

(g) Remote operation of a World Station is allowed where the operator is situated within the same country on the DXCC list as the Remote Station

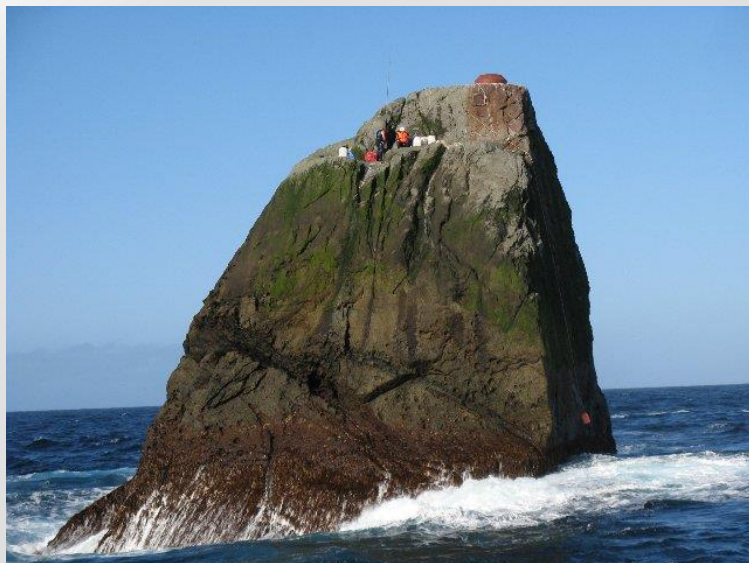

(h) Remote operation of an Island Station is only allowed only where the operator is situated on the same IOTA Island as the Remote Station

(i) "Island Station - Fixed", a station operating from a qualifying IOTA island, explained in Rule 4(a).

(ii) "Island Station - DXpedition", a station also operating from a qualifying IOTA island. In addition, the island can only be reached by boat or air. Islands which can be accessed by bridge or causeway, man-made or natural, are not eligible. The majority of operators must also be non-resident on the island. And the operators must take all radio equipment and antennas with them, and must not rely on a resident or on any masts or towers already installed for any part of the station.

(iii) A "World Station" is any station which is not an Island Station.
